Re: Letter of Reference

To Whom It May Concern;

The City of St. Catharines prequalifies mechanical contractors for work that is put out by the City. This process ensures that the City only engages contractors that have the proven skills to successfully carry out some of the complicated projects that are tendered. Group 92 has successfully carried out many projects, varying in size and complexity, for the City of St. Catharines. Some of the highlight projects include the Seymour Hannah Sports and Entertainment Centre, Lake Street Service Centre Facilities Repair Bay Addition and the New Salt Storage and Wash Bay Addition.

All projects were successful in terms of the contractor's workmanship, scheduling and overall budget. The City of St. Catharines looks forward to working with Group 92 on future projects.

Yours truly,

A handwritten signature in blue ink, appearing to read 'A. Martuccio'.

Anthony Martuccio, P.Eng.  
Design and Construction Engineer
